Pipe & Drape Frame

ASSEMBLING:

1. The bases are the square flat pieces with a silver cylinder. Tighten the cylinder by turning it clockwise.
2. Slide the black poles into the cylinders and adjust to the correct height by using the clamp built onto the pole. Tighten the clamp once you have adjusted the height.
3. The silver pole is the one that slides into your black drape. Adjust the pole to the proper width by using the pressure knobs on the pole. Make sure the drapes are all facing the same way with the seams in the back. Slide poles into the pockets of the top of your drape.
4. Hook the drapes on the top to each side pole by simply placing the silver hook into the receiving end.
5. Adjust the bases so that your drape hangs evenly. If your stand is pitching forward or back either your bases are not the correct width apart or your base cylinders need tightened.
